

Questionnaire for City Council Candidates 2009 Palo Alto Neighborhoods (PAN)

To the readers: The intended audience for this questionnaire is normal residents who are interested in the issues (versus activists who are deeply enmeshed) and the candidates were instructed to respond appropriately (detail and length). The candidates have diverse backgrounds and the questions are intended to be open enough to allow them to demonstrate their knowledge, experience, priorities and perspectives while being constrained enough to allow you to make comparisons between the candidates. The questions are not intended to allow safe, generic responses that reveal little. The candidates' responses will stay in the same order relative to each other, but we rotated whose response is first. Candidates have the option of including clickable links (hyperlinks) in their responses and of making the name at the beginning of each response clickable.

For more information on the candidates and their positions, you are encouraged to visit their individual websites, which can be found at:
